Degree in this
Accredited Program.**

Employment Profile

According to the Educational Testing Service, employment for managers is expected to grow at an average pace despite mergers and takeovers. Jobs in the service and computer industries as well as in professional firms are expected to grow the fastest.

Earnings will vary depending upon size of the company, location, industry, function, responsibilities, education, experience, and ability. Self-employed managers and supervisors can earn substantially higher wages. Business owners' wages are, of course, limited only by their imaginations.

Additional information may be found on the SSC website, www.ssc.edu, under Academics/ Career Education Programs. Occupational outlook information for Illinois may be found on the Internet by visiting either stats.bls.gov or lmi.ides.state.il.us.

“The technician builds a job; the entrepreneur builds an enterprise.”

Program Information

The Small Business Management/Entrepreneurship program at South Suburban College emphasizes accounting, management and communication skills as well as small business management, business law, human resource administration and advertising and marketing applications.

The program is structured to help students meet their goals, whether they wish to obtain a Basic Certificate, or work towards an Advanced Certificate or Associate in Applied Science Degree or transfer degree.

Many participants who have completed certificates in a variety of careers are provided an opportunity to obtain a degree by transferring specialty courses to the Small Business Management/Entrepreneurship Program.

Admission Requirements

Admission requirements vary for each of the programs and are described in the college catalog. For more information, please contact the Business & Technology Programs Office at (708) 596-2000 Ext. 2664.

Small Business Management/ Entrepreneurship Overview

Owning your own business can be a rewarding experience—one that requires extensive knowledge in numerous subject areas. This program is designed for men and women who plan to or presently operate their own business. They will gain a foundation of knowledge and assist in the development of a business plan.
