Explanations**COOK COUNTY**

The following list is considered as those days for which holiday rates of wages for work performed apply: New Years Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and Veterans Day in some classifications/counties. Generally, any of these holidays which fall on a Sunday is celebrated on the following Monday. This then makes work performed on that Monday payable at the appropriate overtime rate for holiday pay. Common practice in a given local may alter certain days of celebration. If in doubt, please check with IDOL.

TRUCK DRIVERS (WEST) - That part of the county West of Barrington Road.

Programmatic Justification Narrative

District / College: 510 / South Suburban College

Project Name: Allied Health Addition

South Suburban College is requesting capital funds to build an addition to the current main campus structure as an allied health, child care, and education facility. This facility will service the district's constituents.

With more than 500,000 jobs added since the start of the recession, it's no surprise that allied health fields are forecasted to remain a key source of job growth. Jobs in inpatient and outpatient settings and nursing care facilities will be in high demand and the healthcare support industry (such as medical assistants, nursing and physical therapist assistants) are slated to experience 48% growth.

Involved with the delivery of health or related services, workers in allied health care fields include a cluster of health professions encompassing as many as 200 health careers. There are 5 million allied health care providers in the United States who work in more than 80 different professions representing approximately 60% of all health care providers. Yet, that number is no match to the number of allied health care workers that are needed to meet current and future needs in America .

Our current enrollment trends display a dramatic increase in allied health and nursing with over 25% of our total student population choosing career pathways in these fields. Allied Health and nursing positions in the area are in high demand and the health professional industries are requesting more assistance in staffing these positions. The shortage in this field requires an immediate response with increased educational programming and scheduling. We are developing new certifications in Health Information Technology, Speech Language Pathology Assistants and Community Health Worker Programs to expand health field opportunities for our students. But more needs to be done to address this problem.

With student enrollment in allied health education programs gaining momentum, major advancements in technology coupled with shifts in education audiences, learner profiles, campus

* Educational partnerships are increasing as institutions share technology and information with other colleges, universities and companies to deliver cooperative educational programs.

* Emphasis is shifting from degrees to competency as employers place more importance on knowledge, performance and skills.

Technology Trends:

* Technology competency is becoming a requirement.

* Immense growth in Internet and technological devices.

* Institutional instruction will involve more computerized programs and simulations.

* Colleges will be required to offer the best technological equipment to remain competitive.

Classroom Environment Trends:

* Classroom environments are being designed to mirror real-life career settings.

* Flexible classroom settings geared for multi-instructional learning.

* Color, lighting, acoustics, furniture and design capitalize on comfortable learner-centered environments .

Even with the addition of many classes and creative scheduling strategies for optimal room utilization, we are still far from meeting the demand for courses in these fields. For example, last year we had over 200 students in the fall semester on a waiting list for additional nursing assistant slots, 50 students on waiting list for the radiologic technology program, etc. for a total of over 1000 students on waiting lists for additional classes. Feverish attempts were made to schedule and staff as many sections as possible to meet student needs; however, space restrictions for both classrooms and laboratories prevented us from significantly impacting this lengthy waiting list.

In addition to the allied health and nursing career fields, recent changes in the field of teacher education in Illinois and throughout the nation have opened up new responsibilities for community colleges. This has happened in several ways: 1) In Illinois, community colleges are playing a larger role in providing the education coursework which formerly was done only at four-year institutions. A new Associate of Arts degree in Teaching (ATT) is being formulated by ICCB for this purpose, and 2) The "No Child Left Behind" legislation has inundated our education program with requests from districts for coursework and training of their classroom paraprofessionals. South Suburban College is playing a significant role in providing teacher education opportunities. Curricular changes are being made for a new AAT degree and

affiliations with for-year institutions are underway for seamless educational programming for a Bachelors Degree in Education on our campus. Governors State University is working with South Suburban College so that students could complete the Bachelors Degree in Education on our main campus. All of these changes have created a need for additional classes, instructors and classroom space.

We are in dire need of additional classroom and laboratory space to accomplish our goal of providing more courses for allied health and education majors who will have immediate job placement opportunities within our district. But some students within our district will not be able to benefit from this proposal without child care assistance. Many talented individuals within the district are limiting their educational goals solely due to a lack of affordable child care facilities. Our affordable child care facility has seen a surge in enrollments consistent with our tremendous growth in students over the past few years. The facility no longer has enough space to accommodate this need. The proposed building addition attempts to address this problem with a new child care facility built in to manage a larger number of children.

The proposed child care facility also adds a new dimension to our teacher education program as it builds in a teaching space and observation space for our students to experience classroom techniques being utilized within the child care facility. So we envision the space to be an educational enhancement for our teacher education program as well as a service facility for district students. This dual purpose provides even more justification for the necessity, importance, and creative programming involved in the proposed building addition.

Scope of Work Narrative

District / College: 510 /South Suburban College
Project Name: Allied Health Addition

The general scope of this project entails building an additional 130,000 square foot facility on to the south end of the main building of South Suburban College. The new addition will accommodate our Allied Health Programs, such as, Nursing, License Practical Nursing, Radiology, Occupational Therapy, Pharmacy Technician, Medical Transcription, Phlebotomy, Medical Assistant, Medical Records, and Coding Specialist. The new addition will also accommodate an expanded Child Care facility.

The new addition will require classrooms, laboratories, offices for faculty, study areas and support facilities. Since this is new construction, this project will require all basic infrastructure needs for a new building. The college architects have drafted a preliminary proposal that includes breakdowns for general construction, mechanical systems, lighting, site grading, storm water retention, sewers, paving for additional parking and landscaping, that will meet the needs of our students, faculty and staff needs.

All construction will meet ADA state and federal requirements, as well as local and state construction code requirements.

Programmatic Justification Narrative

District / College: 510 / South Suburban College
Project Name: Parking Lot / Roadway and Storm Water
Management Improvements

The functional relationship between the project and instruction is the level of customer service provided to the students. Studies indicate that the physical environment impacts, not only the institution's ability to market itself, but also, the comfort level of students who chose to attend the institution.

The majority of the parking lots and roadways are approximately 20+ years old. The soil beneath the lots and roadways is relatively unstable because of the fact that South Suburban College is located in an area of very high water table. Obviously this is not a good condition for developing asphalt paving systems. In addition, drainage systems for the area are inadequate to compensate for the storm water management required for this relatively impervious site. These surfaces have been subjected to extreme freeze / thaw cycles, plowing, salting, ultra violet radiation exposure and heavy traffic. Due to age and conditions of the parking lots and roadways and what they have been subjected to, they are in need of repair.

Another related concern to developing the aforementioned parking lots is resolving the storm water management and detention requirements by law. These items need to be addressed and resolved in accordance with the ordinances of the Metropolitan Water Reclamation District of Greater Chicago (MWRDGC).

Many students and staff members have complained about the conditions of the road and parking lot conditions. Not only are the surfaces unsightly, they present dangerous conditions. Pedestrian traffic has to navigate uneven surfaces and potholes. Even though remedial action to patch these adverse conditions is continually being applied, the deterioration is verging on or has attained failure.

The storm water management – detention cannot be avoided any longer. Inadequate drainage conditions often lead to flooding. Potholes and rough surfaces can damage vehicles as well as having the pedestrian liabilities.

District / College: 510 / South Suburban College
Project Name: Parking Lot / Roadway and Storm Water Management
Improvements

Full Name of Building (If remodeling): N/A
Exact Location (Including Address and City):
15800 South State Street, South Holland, Illinois 60473 (Main Campus)

This Project will be the culmination of updating and developing of the Storm water management – detention most recently developed and applied for permitting in 1995 with MWRDGC. Using the historical storm water and flood control submittals to the MWRDGC for Thornton Community College, currently South Suburban College, the following scope has been developed.

Planning and development will be refined as originally intended when the ICCB recommended and CDB approved ICCB project no. C-0021-0700 (CBD no. 810-094-18) funds are obligated. This may or may not cause some adjustment to the following scope.

Storm Water Management:

**Wetland flood plain improvements and expansion Schaaps Slough
(North Creek):**

This is to aid in controlled release rates of storm water run-off as well as maintaining the designated wetland to its proper state and area.

Drainage Systems:

This would involve the installation of piping systems to divert rainwater away from flood prone areas.

Detention Ponds:

Addition of at least two more ponds to detain stormwater and control the release of stormwater into the storm water systems governed by the MWRDGC and possibly the Army Corp of Engineers who may have jurisdiction over Schaaps Slough (SSC North Creek)

Mechanical Dumping Systems

Lift stations may require re-grading to divert excess water into drainage systems and detention ponds.

Originally Designed Main Building Roof Detention: (to be re-investigated).

Parking Lots and Roadways:**Demolition:**

Demolish and remove damaged concrete, asphalt and curbing, The material will be taken off site. If possible, the material will be recycled and used on the project.

Drainage Systems:

Rainwater runoff systems will be installed to divert water away from the new surfaces. Detention ponds will be built, as needed, to meet local and state guidelines for stormwater management.

Base System:

Re- contouring of the paving bases to permit proper run-off and some storm water release control.

Asphalt and Concrete Curbing and Walkways:

Road, parking lot surfaces and curbs will be installed according to architect recommendations.

Landscaping:

Areas incorporated within the parking lots for aesthetic as well as functional parts of the storm water management.

Striping and Painting:

Heavy-duty weather resistant paint will be applied.

Lighting Upgrades and Additions:

Upgrading of aged existing lighting fixtures and the addition of new fixtures to provide additional safety will be accomplished.
